Who We Are?

Who We Are?

With over 40 years of experience **AMTCPDC** is now acknowledged as one of the best manufacturers of the Pressure Die Casting components.

Complete solution to Die Casting technology is available to our customers ranging from tool designing, casting, machining, surface finishing and sub assembling.

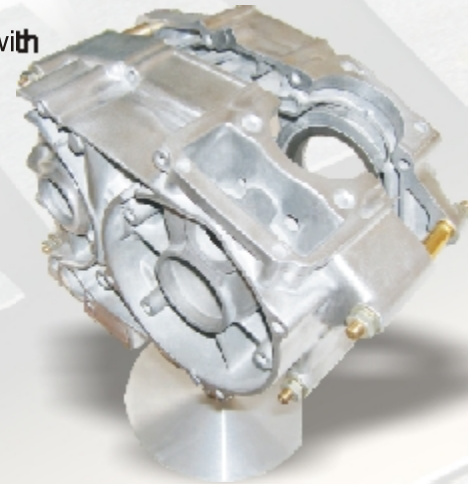

Our vast experience coupled with technology up gradation and continuous improvement enables us to successfully supply Pressure Die Casting to a wide array of industries, be it automotive, energy related, house hold, or any other. In choice of materials and tool design **AMTCPDC** works closely with its customers to maximize Quality with Reasonable Pricing and the ultimate intention to provide the best service to the customers.

Die Casting Machine Capacity

Die Casting Machine Capacity

AMTCPDC houses 10 cold chamber High Pressure Die Casting Machines with locking force varying from 150 tons to 800 tons. This range enables us to manufacture casting weighting from few grams upto 8.5 Kg.

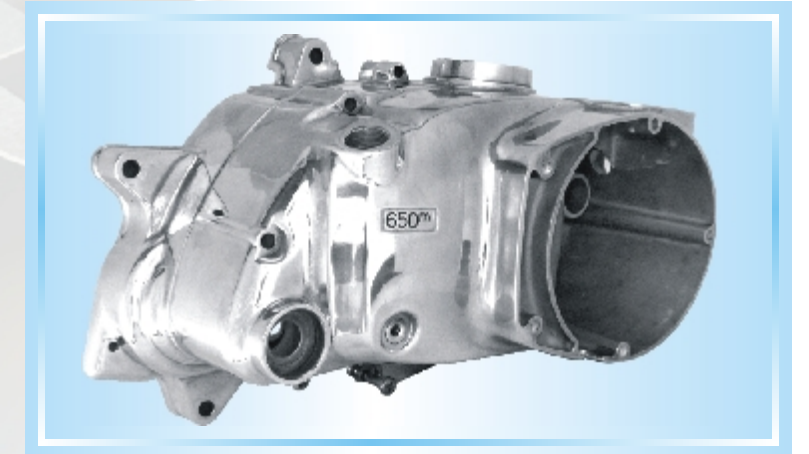

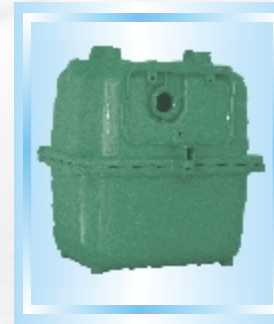

AMTCPDC has standardized the use of Auto ladler, Auto sprayer and Auto extractor on its new Die Casting Machines to satisfy huge volume orders and to ensure repeatability in castings.

Surface Finish

Surface Finish

A different variety of surface finishes are available to our customer. Using the very best of materials and modern process an appealing and long lasting finish is ensured. **AMTCPDC** houses a newly setup for Electrostatic Powder Coating, where castings are pre-treated with chromate to ensure better adhesion of the paint to the surface. Powder Coating compared to liquid paint promises a very durable and long lasting finish and is available in different kind of textures and materials to suit individual needs. As well as Powder Coating **AMTCPDC** do offer buffed finish or wire brushed finish, finishing off with clear lacquer.

Sub Assemblies

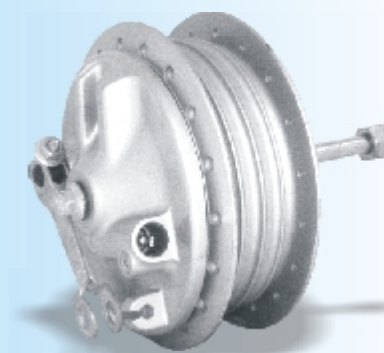

Sub Assemblies

Sub Assemblies

sub assemblies

AMTCPDC also offers its customer sub-assembly or full-assembly service. As per customer needs many of the others components can be outsourced and assembled in-house to be dispatched to our customer in ready to fit/use form.

This helps our customer in reducing cost and time which in turns increase their production.
