# About Saad Textile

## Fabric Division

Saad Textile Mills Private Ltd was established as a sheeting fabric manufacturing unit in 1994 at 8 kms on the Manga-Raiwind Road. Equipped with 151 Sulzer projectile wide width looms, the fabric division is capable of producing 6 million meters of greige fabrics per year in various widths. The finished fabric is exported to European market as greige material as well as basic hospital and institutional bed sheeting.

## Towel Division

In 2003, a modern Towel Division was established as part of Saad Textile Mills Private Limited. A fully integrated set up terry towels manufacturing unit, it is capable of weaving, dyeing, finishing, stitching, grading and packing of terry towels and other textile made ups.

“Our entire production is exported to Canada, USA, Australia, Spain, Germany, France, Italy and United Kingdom.”

“We are currently being evaluated for ISO 9000 and OEKO TEX100 certification.”

“Every year Saad textile participates in Heimtex Fair in Frankfurt.”

# Process

## Weaving

Saad weaving has 8 G6300 machines from Smit; 6 colors & 20 lever dobbies. In addition we have 22 G6100 machines with a combination of Grosse Jacquards & electronic dobbies. It is capable of weaving retail as well as institutional towels in a variety of densities from 400 to 800 gsm in towels and from 550 to 1200 gsm in bath mats. Yarn dyed towels in stripes as well as textured jacquard designs are also produced.

## Dyeing

The dyeing unit consists of 2 THEIS soft flow machines, made in Germany, supported by 2 smaller dyeing machines from ATYC . Further processing is done through a series of hydro extractors and a BIANCO un-curler. Our drying range consists of a dryer range from SANTEX and a THEIS tumbler. The dyeing department is capable of handling 150 tons of material per month.

## Sewing Section

Stitching is done on high speed automated length hemmers from Schmale and flat lock stitching machines with customized labeling. Every towel is individually cropped, checked, graded and packed in poly bags, cartons or bales as per customer requirements.
